VISIONARY INTEGRATION PROFESSIONALS

VIP Company Overview

A Strategic Approach to Accelerate Results

Visionary Integration Professionals (VIP) offers a diverse solution portfolio that allows organizations to better align strategy to execution. Our four core disciplines – Management Consulting, DevOps, Software Quality Management and Organizational Development – provide the visibility, planning, and agility needed to accelerate strategic change. Today, more than hundreds of organizations have made the right business improvements to optimize processes, instill governance, ensure security, build future leaders and capitalize on success. Founded in 1996, VIP has delivered measurable results for commercial, federal and state and local organizations big and small.

Management Consulting

Navigating through organizational change initiatives can be muddy and complicated. VIP helps eliminate the complexities through a strategic approach to change management. Organizations rely on VIP to implement the right strategy, people and processes to help you automate and optimize processes, strengthen your business and achieve success.

DevOps

Creating a culture of communication and information sharing between development and operations teams isn't just a dream, it's a possibility. VIP helps bridge the communication gaps between IT and development teams to ensure the people, systems and technologies involved in product lifecycle are properly evaluated, implemented and managed.

Software Quality Management

Today's consumers have high expectations, and your products and technologies cannot fall short of their demands. VIP helps organization automate, manage and optimize the people, processes and technologies utilized throughout product development, testing and deployment to ensure you're delivering the highest quality software.

Organizational Development

Successful organizations are focused on building a culture of learning and development. In order to do so, organizations need a strong learning and development strategy built on proven technologies and best-in-class content. VIP helps

organizations define learning strategies, create unique content, and select and implement the right learning technology solutions.

VIP Performance Delivery Solutions®
