# VIP PROformance for Mobile

DELIVERING AFFORDABLE, FIXED-PRICE PERFORMANCE TESTING  
FOR MOBILE APPLICATIONS

## Don't Risk Going Live Before You Test Performance

Did you know that 48% of mobile users are less likely to use an application again if it doesn't perform well? While mobile applications have become essential for many organizations, approaches to ensuring their quality have not evolved at the speed of mobility.

Since 1996, Visionary Integration Professionals (VIP) has delivered testing and performance monitoring solutions that reduce risk, ensure applications fulfill service-level agreements, and meet end-user expectations. With VIP on your side, you'll be able to confidently gain a clear view of how your mobile application will perform under specific loads before you release it to your user community.

## Trust VIP to Deliver Proven Mobile Performance Testing at a Fixed Price

The VIP PROformance service is a fixed-price performance testing package that includes software, hardware, hosted Internet or on-premise load generation, and our skilled engineers to architect advanced performance tests. This packaged solution helps any business test or fine-tune an application's performance without having to invest in dedicated staff and tools, or tying up internal resources.

Powered by HPE LoadRunner and Perfecto Mobile, VIP PROformance supports a wide variety of mobile application architectures and processes. It is ideal for testing:

- Any applications developed in iOS, Android, Microsoft, and Blackberry
- Any web-based solutions that have a mobile-optimized responsive design

## Benefits for Your Company

VIP PROformance does more than provide detailed insight into your mobile application's performance under load. You also get:

- Iterative testing to help verify proper configuration

VISIONARY INTEGRATION

**VISIONARY  
INTEGRATION  
PROFESSIONALS**

- Expert advice on placing monitors to locate and resolve bottlenecks in application configuration, network, database, and hardware
- Fixed price – affordability with industry leading tools and customized scripts
- Fixed duration – our clients do not fall into the black hole of endless testing
- Externally-hosted load testing from VIP with global reach
- Security – test data remains inside your firewall and only monitoring statistics are transferred securely to VIP for correlation and analysis

## Included:

1. VIP expertise to scope and plan performance tests and develop custom scripts
2. VIP expertise to schedule and conduct testing and analyze performance test results, including off-hours execution as required
3. Use of HPE LoadRunner and all necessary performance monitors
4. VIP hardware to develop scripts and host the external load generation
5. Mobile load generation (optional)
6. Remote test administration
7. Comprehensive final performance report, including key findings and analysis of performance results
