- *Terumo*

Revolutionize Your Digital Health Strategy

More people than ever are using technology to monitor and track their own health or the health of a loved one. With the influx of aging patients entering the healthcare system, the strain of multiple government-mandated changes and the demand for digital forces many organizations to struggle to keep up.

As the challenges in the healthcare industry increase, the need for performance and improved end-user load testing grows. You wouldn't risk your patients, so why risk your healthcare applications?

Visionary Integration Professionals understands the struggle to keep healthcare applications risk-free and healthy. We draw on a deep technology expertise, rich in manual testing and test automation tools, to perfect your applications, leaving you free to focus on what's important.

What Sets VIP Apart?

VIP has the agility of a small business and the mature infrastructure and proven processes of a large firm. Our systems integration capabilities coupled with our four disciplines - Management Consulting, DevOps, Software Quality Management and Organizational Development – allow our qualified team members to take a hands-on, highly-collaborative approach to every project. With over a dozen years in the healthcare industry, VIP has experience in implementing custom and COTS solutions, meeting federal, state, local and private regulations, such as HIPAA, MITA, and HITECH.

VIP's Offerings in Healthcare

- Strategic staffing with industry-experienced DevOps team members to meet the growing demand to provide digital healthcare services quickly and securely
 - Manage and integrate custom and COTS modular implementations mandated by the Centers for Medicaid and Medicare
 - Manage MITA Certification and align with the Seven Standards and Conditions for maximum Federal Financial Participation
 - Develop and execute a software quality management strategy to ensure accurate and efficient system performance
 - Develop and execute an organizational development strategy to prepare staff and customers for the change in day-to-day operations
