

# Software Quality & Testing

## Clients Trust VIP to Ensure Streamlined Processes and Quality Applications

Today's IT organizations are under immense pressure to reduce costs, while also improving the performance of their critical software applications. Even with these pressures, organizations often fail to realize the full potential of their IT investments due to a lack of in-house software quality management (SQM) and testing expertise. Many simply do not realize how significantly these programs can impact the overall success of the enterprise.

Visionary Integration Professionals (VIP) is trusted by businesses and government agencies to deliver the skills and experience needed to effectively monitor and improve software quality. We can identify quality and performance impediments before they negatively impact business processes or end-users. Overall, VIP's Software Quality & Testing services and solutions help minimize downtime, increase availability, and control IT costs, while helping you get the maximum return on your IT investments.

## What Sets VIP Apart?

VIP has the agility of a small business and the mature infrastructure and proven processes of a large firm. We deploy the same level of expertise as larger consulting firms, but our streamlined business model allows us to offer more value and a much better return on your investment. For each engagement, VIP's experienced resources take a hands-on approach to collaborating with our clients to deliver innovative solutions on-time and within budget. The results are successfully executed and implemented technology solutions that optimize your business and mission goals. Our client retention rate, which has averaged 90% since our inception, is a testament to our focus on quality.

## Our Services

Clients trust VIP to tailor cost-effective solutions to advise, lead, manage, carry out, and support all aspects of SQM and testing. Call upon our experience in any of the following specialties:

- HP Software Sales, Tier-1 Support and Training
- Strategic Planning and Best Practices
- Functional and Automated Testing
- Performance Testing and Monitoring
- Mobile Testing

## HP Software Sales, Tier-1 Support and Training

As an HP Software Gold Applications Specialist Partner, VIP provides HP Software sales, tier-1 support and training. We support the Application Delivery Management (ADM) and IT Operations Management (ITOM) portfolios with a range of customized and packaged solutions delivered by our highly-skilled team of HP-certified professionals. VIP has provided these services to nearly 200 Fortune 2000 companies since its inception in 1996 – delivering the highest return on investment, while meeting business and mission objectives.

## Strategic Planning and Best Practices

Virtually every IT infrastructure, from the best-run companies to the largest government entities, has vulnerable points in software quality and performance. Testing helps find and resolve these challenge points. Knowing what to test is as important as knowing how to test it. Clients trust VIP to deliver the right experience, assessment methodology, and planning to make the most of their testing budgets and resources.

## Functional and Automated Testing

Automating manual tests is an efficient method to deliver new application releases and control testing resources. As your applications grow to encompass new functionality, test automation tools reduce the cost of repetitive manual testing, while increasing the coverage of regression testing. This reduces costly software fixes in production software, and painful help desk overload. VIP offers a broad range and flexible choices for your automation testing needs. We apply the best tools, proven methods, and experienced professionals for functional and automated testing needs, including custom and ERP/CRM applications. VIP can manage the entire testing process, or just discrete testing services.

## Performance Testing and Monitoring

VIP delivers custom testing services to help customers ensure their applications and environment are performing optimally to support their business goals. With our dedicated and deeply experienced engineers, we deliver reliable, customized load and performance test planning, execution, and results, along with specific recommendations for improving your application performance and planning your performance monitoring. VIP also offers fixed-price, project-based load and performance testing through our Velocity SaaS program, which includes HP LoadRunner software, hardware, and expert services bundled into one price.

## Mobile Testing

Mobile devices have changed the way companies do business. Whether extending the reach of legacy applications, engaging customers, or creating a more agile business, VIP can help. As a software reseller, consulting provider, and strategic partner of Perfecto Mobile, we offer mobile testing solutions, training, and services for their MobileCloud™ Platform. Our Perfecto Mobile Certified Experts (PMCEs) leverage the company's manual, automation, performance, and monitoring solutions in order to ensure usability across hundreds of real handsets and tablets using a cloud-based architecture.

### About VIP

At Visionary Integration Professionals (VIP), we empower client success at every stage of the organizational lifecycle. VIP Performance Delivery Solutions help our clients strengthen business and mission outcomes, drive operational effectiveness, and achieve integrated learning and performance management. Since 1996, we have worked with nearly 1,000 federal, state and local, and commercial clients. We offer expertise in Business & Mission Support, Technology Optimization, Learning & Performance Management, and Federal Personnel Security Management. VIP has five offices across the U.S., including its headquarters in Folsom, California.
